FULL-STACK SOFTWARE ENGINEER

Software Engineer that utilized Boot Camp experience and Freelance Graphic design client management to connect and be a valuable member of multiple client projects at IBM. Graduated apprenticeship program to become an Associate Application Developer and learn to work with client and project workflows improving professional approach and task delivery. Built vital customer service and communication skills through client engagement and training.

SOFTWARE SKILLS

Ruby | Ruby on Rails | Javascript | React | Angular | Java | Junit | SQL | PostgreSQL | HTML | CSS

DESIGN SKILLS

Adobe Illustrator | Adobe Indesign | Adobe XD | Adobe Photoshop | Adobe Premiere Pro | Adobe LightRoom

EXPERIENCE

IBM   Baton Rouge, LA
Application Development   May 2021 - Present
- Angular programming language was used in the majority of my projects to used to build clients' SAP storefronts to develop features
- UX/UI creating interactive media, using Angular framework and connecting to API
- Designed UX/UI features for user experience to interact with webpages features for the site to handle users' input in payment checkout, forms, homepage, and navigation.
- Moderated high to low-priority tasks through Agile framework user stories which are tasks divided up into the more manageable task
- SAP Cloud Development was my primary role where I was a part of client data migration
- Built SAP Backoffice an interface to cover products, client logins, and client's customer info interface
- Used SmartEdit to help clients edit website content, and images
- Implemented SAP Backoffice configurations to boot products and promotions
- Used Junit when working as a tester
- Migrated client data using Hybris standers from Stibo to Commerce Cloud
- Used development best practice skills to ensure Agile workflow

Freelance Graphic Designer   Chicago, IL
Independent Freelancer   June 2018 - April 2020
- Built a professional-level active portfolio using the Adobe Suite, including Photoshop and XD for business and nonprofit clients
- XD used to implement UI and UX design for Web Applications for mobile and desktop dimensions
- Photoshop used to edit and create clients' created expressions
- Typography to create custom fonts and styling
  Typographical fonts were used to explore and create a brand identity for clients
- Photoshop and Adobe LightRoom used to enhance clients' photography and other creative works
- Using Adobe Illustrator for art covers for digital and printable materials

EDUCATION

Flatiron   New York, NY
Software Engineering Certification   June 2019 - October 2020
- Created open-source projects using modern languages, including Javascript, Ruby, and React, while working alongside experienced industry professionals. Utilized modern ES6 standards, including useState and React Router Dom for page and site navigation.
- Developed full slack applications with API and Client-Side interface.
- Built an O-Auth authorization as a part of a project to protect users' data database.
- Deployed learned project using Heroku and Github
- Created a React final project that implemented a Rails API, and was created to have users interact with a personalized search profile.
